Cloudslide
Managing speaker presentations painlessly

Flexibility? Universal access? Is it secure? Where? Opportunities? Who? Added value? Extras? ?? Satisfaction? What for? Feasible? Why? Reliable? Easier? Technologies?

Friendly for organizers
- Intuitive web management interface
- Easy program scheduling uploading
- Oversee user usage & reminder

Unattended but controlled
- Speakers handle their uploads themselves
- No file format or directory restrictions
- Automatic disk quota management

Event Assessment
- Surveys for speakers
- Copyright/publishing authorization management
- Perpetual web access for public presentations

Friendly for speakers
- Standard file access style (Owncloud)
- One location per talk
- Shareable access for co-authoring

Last minute access
- Organizers define time-frames and deadlines
- Uploading availability up to the session beginning
- Speakers could update files after the conference

Crossplatform
- Standard web access
- Native clients

Friendly for IT/Room Clerks
- Can be fully installed in 5 minutes
- No more USB or HMDI-VGA vs Beamer fights
- Autonomous presentation/session update in every venue

Secure and trustworthy
- Passwordless access
- Unique encrypted URL per talk
- Secure access through https

Flexible
- Highly customizable:
Multi-session, Multi-block, Multi-congress and Multi-organizer

BPM 2017

Results

As a speaker, how did you manage your slides?*

- I would like to have my presentation available on the computer provided for the organization.
- I would prefer to bring my own laptop anyway.
- I would prefer to bring my own USB memory device.

Did you use the Cloudslide uploading file service?*

- Yes, and everything worked fine.
- Yes, but I had some issues that could be successfully fixed.
- No, but I will if necessary.
- No, and I am not interested in this kind of services.
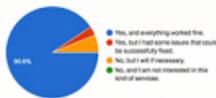

* Over 300 users and 80 managed sessions
